

## Appendix I: Expenditures for Graduate Assistantships

*Note: Tables in Appendix I were updated on October 6, 2006*

*Table 1: Definitions of Column Headings*

<b>Grad School:</b>	Funds provided by the Graduate School for graduate assistantships
<b>Ext. funds:</b>	Graduate assistantships from non-state revenue sources such as grants, contracts, etc.
<b>Unit funds:</b>	Graduate assistantships provided by the budget unit from state funds such as lapsed salary dollars.
<b>Number of semesters enrolled:</b>	Assistantship expenditures to graduate students enrolled for the number of semesters indicated (summer semesters excluded).
<b>Other:</b>	Number of semesters enrolled could not be determined.

**Table 2: Expenditures for Doctoral Assistantships, AY 2002 / 2003**

Unit Description	Total Amt	Subtotal, by source of funds			Subtotal, by number of semesters enrolled				
		Grad School	Ext. Funds	Unit funds	1 to 4	5, 6	7, 8	9+	Other

## Appendix II: Graduate Admission Data

*Table 1: Standardized test descriptions*

1. The GMAT (Graduate Management Admission Test) is a standardized exam used primarily by the College of Business. In October 2004, the national mean score was 529 = 50<sup>th</sup> percentile.
2. The MAT (Miller Analogies Test) is a standardized exam used primarily by the College of Education. Raw scores between 46 and 47 are generally near the 50<sup>th</sup> percentile.
3. The GRE (Graduate Record Exam) is a standardized exam in three parts, verbal reasoning, quantitative reasoning, and analytical reasoning. GRE Verbal scores (470 = 50<sup>th</sup> percentile) and GRE Quantitative scores (620 = 50<sup>th</sup> percentile) are used by most graduate programs. The GRE Analytical score was recently rescaled and is not reported here to avoid inconsistencies.

## Appendix III: Recommended Definition of Post-Baccalaureate Programs

***Certificate Programs*** – Certificate programs are post-baccalaureate programs consisting of a structured collection of courses and possibly other educational instruments designed to enhance the knowledge, skills, and/or abilities of an individual in a particular area or discipline. Certificates may be sought by a person currently enrolled in a degree program or by a person in a field who wishes to enhance his/her knowledge level or marketability in a particular area. A certificate program will usually consist of ***at least*** 12 credits in one or more fields that are organized to provide a coherent body of information to achieve the aforementioned goals. Students wishing to enter certificate programs must go through an admissions process similar to students seeking degrees.

***Master's Degree*** – A master's degree is an academic degree awarded to an individual who has completed a structured program of study beyond the baccalaureate level. In almost all cases (executive MBAs may be the exception), a baccalaureate degree is an entry requirement for study at this level. These degrees may be awarded in academic disciplines (e.g., M.A. and M.S.) or in the professions (e.g., M.B.A. and M.A.T.). Degree requirements include ***at least*** 30 semester credit hours. These credits may consist of some combination of formal coursework; independent research, scholarship, artistry, or creative activity; and seminars. Requirements for the master's degree may include a thesis which reflects original research, but not necessarily that which advances the boundary of knowledge basic to a field; A professional paper which lacks the rigor of a thesis, but may represent a compilation of information (e.g., literature survey), or other form of intellectual enquiry; or solely coursework. In the professional areas, theses requirements are rare; however, credit requirements may considerably exceed 30 semester credit hours.

***Doctoral Degree*** – As with master's degrees, the doctoral degree is a post-baccalaureate degree award to individuals in an academic discipline or in a profession. The Doctor of Philosophy (Ph.D.) is considered to be the highest degree offered in American universities. Entry into a Ph.D. program is contingent upon the completion of a baccalaureate level degree and is awarded to those who have completed ***at least*** 72 semester credits beyond that level. Credits may be earned in coursework, seminars, and research. The defining requirement of a Ph.D. is the completion of a dissertation that represents significant original scholarship and contributes to the intellectual corpus of the discipline(s) in which the degree is offered. Publication in the refereed literature is an implicit expectation of Ph.D. recipients.

A variety of professional doctorates are offered by American universities that are as diverse in their requirements and structure as they are in number. Certain professional doctorates may be clinically-based and require a certain number of contact hours (as opposed to credit hours) as a requirement and not have a dissertation component. Others may require practicum or other similar educational experiences. However, all are intended to enable the recipient to practice their profession (with or without supervision) after graduation.

## **Appendix V: Student Retention, Graduation and Persistence Rates**

*Table 1: Definition of Terms*

1. Retention represents the number of students in the cohort who enrolled during subsequent years.
2. Graduation represents the number of student from the initial cohort who graduated in a given year. The percents for graduating are cumulative reporting all students who have graduated.
3. Persistence represents the number of students currently enrolled plus the number who have graduated. The percents are cumulative--graduates plus the year's current enrolled students. This measures the proportion of students who have graduated or are still in the program.
4. Note: Due to movement across programs, the percent of students who graduate or persist may exceed 100%.
